

Lesson Plans for April 6th – April 24th

Hello 6th Graders,

I hope you find these lesson plans to be helpful and not overwhelming. If you need help please email or call me at 991-3332. I will do my best to help. Also it is very important to send me your work so I can grade it and let you know how you are doing. On Friday, my plan is to do a video conference call from 9:30 – 10:15. You are not required to participate in the call but please do if you can. This will be a good time to ask questions and check in.

These lessons are all on Google classroom. YOU MAY USE A CALCULATOR FOR THE NEXT 3 WEEKS!!!

April 6th and 7th

Complete journal pages 225 and 230. This is a review of GCF, LCM, and inequalities (greater than $>$, less than $<$, equal to $=$).

April 8th and 9th

Watch the videos on Finding Area of Parallelograms and Triangles. Complete the first set of worksheets for practicing finding area.

April 10th

Optional on Friday - video conference call at 9:30 😊

Make corrections and catch up on any work you may owe.

April 13th and 14th

Watch the video on Finding Surface Area Using Nets. Complete worksheets Surface Area of Solids using Nets and Surface Area Using Nets

April 15th and 16th

Watch the video on Finding Surface Area of Rectangular prisms. Complete the worksheets Surface Area – Rectangular Prisms and Fixed Edge Length, Different Surface Area.

April 17th

Make corrections and catch up on any work you may owe.

Optional - Join the video conference at 9:30.

April 20th and 21st

Watch the video on Finding Volume of Rectangular prisms. Then complete journal pages 249 and worksheet Learning Volume.

April 22nd and 23rd

Complete the worksheet Volume – Rectangular Prism and take Surface Area and Volume quiz (summative).

April 24th

Make corrections and catch up on any work you may owe.

Optional – Join the video conference at 9:30.

Have a wonderful & restful
vacation!!
